

Dataset

Dataset Title:

Plant Growth Stages with Environmental and Management Data

Dataset Description:

This dataset includes detailed observations on environmental factors (temperature, humidity, light, soil moisture, etc.) and management practices (irrigation, fertilization) linked with various plant growth stages (germination, vegetative, flowering, fruiting, etc.). It enables machine learning and analytics to predict and monitor plant growth under different conditions.

Key Fields:

- Temperature
- Humidity
- Soil Moisture
- Irrigation Amount
- Fertilizer Usage
- Growth Stage

Dataset Link (Kaggle):

<https://www.kaggle.com/datasets/adilshamim8/greenhouse-plant-growth-metrics>

In this both dataset I have researched and analysed and then fined problem faced and in that way I have created project.
